The graduate degree programs offered in the School of Engineering include a course-work MEng and research thesis programs at the MASc and PhD levels. All programs are offered as full- or part-time studies. These programs provide for specialization in six fields of study:

1. Biological Engineering
2. Computer Engineering
3. Environmental Engineering
4. Engineering Systems and Computing
5. Mechanical Engineering

- **Biological Engineering** is broadly categorized as bio-process, food, biomedical or biomechanical engineering. Research is conducted in many areas such as: physical, chemical and thermal processing of food, biomaterials or waste; physical properties of biological materials; process control; remote sensing; medical imaging; bioinstrumentation design and the development of medical diagnostics; ergonomic and prosthetic biomechanics; design of implants and surgical tools for human and veterinary applications.

- **Computer Engineering** is about the design and implementation of computer devices and systems. Driven by the ubiquity of integrated computing systems, Computer Engineering has expanded from a discipline with a few core areas, mainly focused on the design of microchips, to a broad field with widespread ramifications. It involves mapping computing ideas into physical implements and software components. Some active research areas include: integrated circuits and microprocessors, digital systems design and computer architecture, high-performance and configurable computing, telecommunication and cloud-computing networks, operating systems and software engineering.

- **Environmental Engineering** involves methods to prevent or mitigate damage to the environment by the reduction, treatment, or reclamation of solid, liquid, or gaseous by-products of industrial, agricultural and municipal activities. Emphasis is on the behaviour and fate of contaminants in the environment. Recent research topics include the following: composting of organic solids; control and remediation of chemical spills; wastewater treatment; soil/site remediation technology; policy innovations; air pollution and meteorology; vapour exchange and supercritical fluid extraction; air-surface pollutant exchange measurement; bio-filtration and membrane technologies; modelling of environmental processes.

- **Engineering Systems and Computing** involves development of digital or microelectronic devices, computer or robotic technologies and their application to manufacturing, computing, mechatronic or embedded systems. Some active research areas include: soft computing and neural networks; autonomous robots; intelligent control systems; micro-electromechanical (MEMS) devices; embedded systems and special purpose computing; VLSI circuit design and layout; analog integrated circuits and system-on-chip design; integrated sensor systems and networks; digital devices and signal processing; wireless and optical communication systems; cryptographic systems.

- **Mechanical Engineering** combines individual depth of experience and competence in a particular chosen major specialty with a strong background in the basic and engineering sciences. It strives to develop professional independence, creativity, leadership, and the capacity for continuing professional and intellectual growth. To help support the objectives of graduate degree programs at Guelph, an interdisciplinary learning environment is provided. Research areas that are pertinent and in line with Guelph’s vision include: sustainable energy, sustainable mobility, sustainable design, lifecycle design and assessment, systems modernization, materials and manufacturing, thermo-fluids, solid mechanics, remanufacturing, intelligent control system, closed-loop supply chain management, product life assessment and engineering management.

- **Water Resources Engineering** involves investigation, analysis and design of systems for control and utilization of land and water resources as part of the management of urban and rural watersheds. Research areas include: water quality control and safety; resource use and groundwater quality; hydrologic modelling; design and planning of urban water and sewage infrastructure; rural waste treatment systems; erosion control; non-point source pollution and mitigation; Geographic Information Systems (GIS); sediment and contaminant transport; irrigation and drainage modelling.

### Administrative Staff

**Director**
John Runciman (Thornbrough 2408, Ext. 52430)  
jruncima@uoguelph.ca

**Associate Director, Undergraduate Studies**
Andrea Bradford (Thornbrough 1342, Ext. 52485)  
abradfor@uoguelph.ca

**Associate Director, Graduate Studies**
Bahram Gharabaghi (Thornbrough 1407, Ext. 52404)  
soeadgr@uoguelph.ca

**Graduate Program Assistant - MEng**
Lauren Fyke (Thornbrough 1407, Ext. 52404)  
soegrad.course@uoguelph.ca

**Graduate Program Assistant - MASc and PhD**
Jacqueline Floyd (Thornbrough 1405, Ext. 56187)  
soe.grad@uoguelph.ca

**Graduate Program Assistant - Admissions**
Robin Van Alstine (Thornbrough 1404, Ext. 58764)  
soe.gradmiss@uoguelph.ca

### Graduate Faculty

*This list may include Regular Graduate Faculty, Associated Graduate Faculty and/or Graduate Faculty from other universities.*

**Bassim Abbassi**  
B.Sc. Yarmouk, M.Sc. Jordan, PhD Bremen, P.Eng - Associate Professor  
Graduate Faculty

**Sherif Abdou**  
B.Sc. Ain Sams, M.A.Sc., PhD McMaster - Senior R & D Scientist, Vida Fresh Air Corp  
Associated Graduate Faculty

**Hussein A. Abdullah**  
B.Sc. Univ. of Technology, M.Sc., PhD Glasgow, P.Eng. - Professor  
Graduate Faculty

**Bishnu Acharya**  
B.Eng. Tribhuvan, M.Eng. Asian Institute, PhD Dalhousie - Assistant Professor, University of Prince Edward Island  
Associated Graduate Faculty

**Wael Ahmed**  
B.Sc., M.Sc. Alexandria University, PhD McMaster, P.Eng. - Professor
Graduate Faculty

Arafat Al-Dweik
B.Sc. Yarmouk, M.Sc., PhD Cleveland State - Associate Professor, Khalifa University
-associated Graduate Faculty

Mohammad Al-Shabi
B.Sc., M.Sc. Jordan, PhD McMaster - Assistant Professor, University of Sharjah
-associated Graduate Faculty

Amir Abbas Aliabadi
B.A.Sc., M.A.Sc. Toronto, PhD British Columbia, PEng. - Associate Professor
Graduate Faculty

Manick Annamalai
BE, ME Tamilnadu Agricultural, PhD Manitoba, PEng. - Associate Professor
Graduate Faculty

Shawki Areibi
B.A.Sc. Al-Fateh, M.A.Sc. Waterloo, PhD Waterloo, PEng. - Professor
Graduate Faculty

Alexander Bardelcik
B.A.Sc., M.A.Sc., PhD Waterloo, PEng - Associate Professor
Graduate Faculty

Mohammad Biglarbegian
B.Sc. Tehran, MA Toronto, PhD Waterloo, PEng. - Associate Professor
Graduate Faculty

Andrew Binns
B.Sc., M.Sc., PhD Queen’s, PEng - Associate Professor
Graduate Faculty

Andrea L. Bradford
B.Sc., PhD Queen’s, PEng. - Professor
Graduate Faculty

Scott Brandon
B.Sc. Western, M.Sc., PhD Queen’s, PEng - Assistant Professor
Graduate Faculty

Freeman Brian
BS Worcester Polytechnic, MS Air Force Institute of Tech, PhD Guelph - Senior Project Manager, Lakes Environmental Software
-associated Graduate Faculty

Sheng Chang
B.Eng. Chengdu, PhD New South Wales, PEng - Professor
Graduate Faculty

John Cherry
B.Sc. Saskatchewan, M.Sc. California, PhD Illinois - Professor Emeritus
-associated Graduate Faculty

Emily Chiang
BASc, MASc Toronto, PhD Leuven, PEng - Associate Professor
Graduate Faculty

Ryan Clemmer
B.Sc., PhD Waterloo, PEng - Associate Professor

Graduate Faculty

Prasad Daggupati
BS Acharya, MS, PhD Kansas State - Associate Professor
Graduate Faculty

Basil Darras
B.Sc. Jordan, M.Sc., PhD Kentucky - Associate Professor, American University of Sharjah
-associated Graduate Faculty

Charles-Francois de Lannoy
B.Sc. McGill, PhD Duke - Assistant Professor, Chemical Engineering, McMaster University
-associated Graduate Faculty

Fantahun Defersha
B.Sc. Ethiopia, MEng India, PhD Concordia - Associate Professor
Graduate Faculty

Ibrahim Deiab
B.Sc., M.Sc. Kuwait Univ., PhD McMaster, PEng - Associate Professor
Graduate Faculty

John Donald
B.A.Sc., M.A.Sc., PhD Waterloo - Associate Professor
Graduate Faculty

Bob Dony
B.A.Sc., M.A.Sc. Waterloo, PhD McMaster, PEng, FIET, FEC - Associate Professor
Graduate Faculty

Animesh Dutta
B.Sc. Bangladesh, MEng Thailand, PhD Dalhousie, PEng - Professor
Graduate Faculty

Abdallah Elsayed
B.Eng., M.A.Sc., PhD Ryerson - Assistant Professor
Graduate Faculty

Mostafa Elsharqawy
B.Sc., M.Sc. Al Sham, PhD Petroleum & Minerals, PEng - Associate Professor
Graduate Faculty

Cameron Farrow
BEng, MAsc, PhD Guelph - Contractually Limited Faculty, Engineering, University of Guelph
-associated Graduate Faculty

Emil Frind
B.A.Sc., M.A.Sc., PhD Toronto, PEng - Distinguished Professor Emeritus, University of Waterloo
-associated Graduate Faculty

Andrew Gadsden
BEng, PhD McMaster, P. Eng, P.M.P., FASME - Associate Professor
Graduate Faculty

Bahram Gharabaghi
B.Sc., M.Sc. Sharrif Univ. of Science and Technology, PhD Guelph, PEng - Professor
Graduate Faculty

Karen D. Gordon
B.Sc. Guelph, PhD Western Ontario, P.Eng - Associate Professor and Associate Dean (Academic), College of Engineering and Physical Science
Graduate Faculty

Stefano Gregori
Laurea, Doctorate Pavia, P.Eng - Professor
Graduate Faculty

Marwan Hassan
BS Helwan Univ., MS Tuskegee Univ., PhD McMaster, P.Eng. - Professor
Graduate Faculty

Gordon Hayward
B.A.Sc., M.A.Sc., PhD Waterloo, PEng. - Professor Emeritus, School of Engineering, University of Guelph
Associated Graduate Faculty

Hadis Karimipour
B.Sc. Ferdow, M.Sc. Shahrood, PhD Alberta, PEng - Assistant Professor
Graduate Faculty

Kevin Keener
BS, M.Sc. Ohio, PhD Purdue, PE - Professor
Graduate Faculty

Hossam Kishawy
B.Sc. Helwan, M.Sc. Tuskegee, PhD McMaster - Professor, Mechanical and Manufacturing Engineering, Ontario Tech
Associated Graduate Faculty

Amin Komeili
B.Sc. Ferdow (Iran), M.Sc. Amirkabir (Iran), PhD Alberta - Contractually Limited Faculty, Engineering, University of Guelph
Associated Graduate Faculty

Lei Lei
BS, PhD Beijing - Assistant Professor
Graduate Faculty

Jana Levison
B.A.Sc., PhD Queen's, PEng - Associate Professor
Graduate Faculty

Huiyan Li
BEng Harbin, MASc Victoria, PhD McGill - Assistant Professor
Graduate Faculty

William David Lubitz
B.Sc., M.Sc., PhD California, PEng - Associate Professor
Graduate Faculty

Shohel Mahmud
B.Sc., M.Sc. Bangladesh Engineering and Technology, PhD Waterloo, PEng - Professor
Graduate Faculty

Edward McBean
B.A.Sc, British Columbia, S.M., C.E., PhD MIT, PEng - Professor
Graduate Faculty

Manjusri Misra
B.Sc., M.Sc., MPhil, PhD Utkal - Professor
Graduate Faculty

Gauri S. Mittal
B.Sc. Punjab Agricultural, M.Sc. Manitoba, PhD Ohio - Professor Emeritus

Associated Graduate Faculty

Medhat A. Moussa
B.Sc. American, M.A.Sc. Moncton, PhD Waterloo, PEng - Professor
Graduate Faculty

Soha Moussa
B.Sc. American, M.A.Sc., PhD Moncton, PEng - Associate Professor
Graduate Faculty

Radu Muresan
Dipl. Eng Technical Cluj-Napoca (Romania); M.A.Sc., PhD Waterloo, PEng - Associate Professor
Graduate Faculty

Michele L. Oliver
BPE McMaster, MPE, M.Sc., PhD New Brunswick, PEng - Professor
Graduate Faculty

Beth Parker
BS Pennsylvania, MS North Carolina, PhD Waterloo - Professor
Graduate Faculty

Erica Pensini
B.Sc., M.A.Sc. Milano, PhD Toronto, PEng - Associate Professor
Graduate Faculty

Omar Ramahi
BS Oregon, MS, PhD Illinois - Professor, Electrical and Computer Engineering, University of Waterloo
Associated Graduate Faculty

Ramesh P. Rudra
B.Sc. Punjab Agricultural, MS, PhD Pennsylvania State, PEng, FCSBE, FISAE - Professor
Graduate Faculty

R. John Runciman
B.Sc., M.Sc. Queen's, PhD Strathclyde, PEng - Professor
Graduate Faculty

Rafael Santos
B.A.Sc., M.A.Sc. Toronto, PhD Keuven, PEng - Assistant Professor
Graduate Faculty

Hari Simha
BE India, MSE, Austin, PEng - Assistant Professor
Graduate Faculty

Ashutosh Singh
B.Tech. Vellore, M.Sc., PhD McGill. PEng - Associate Professor
Graduate Faculty

Chandra Singh
B.Eng. G.B.Pant, M.Sc. Indian, PhD Manitoba - Associate Professor,
University of South Australia
Associated Graduate Faculty

Petros Spachos
Diplom Crete, M.A.Sc., PhD Toronto, PEng - Associate Professor
Graduate Faculty

Syeda Tasnim
B.Sc. Bangladesh, M.A.Sc., PhD Waterloo, PEng - Assistant Professor
Graduate Faculty
MASc Program

The MASc program is intended to provide advanced training in engineering sciences, analysis, design, and research methodology. This objective is achieved through a combination of course work, applied research, and thesis writing. Upon graduation students will be able to analyze and research an engineering problem and apply their acquired skills and knowledge in a practical solution. A final examination is conducted following a public seminar presentation of the student’s thesis.

Admission Requirements

In addition to the general admission standards of the university, the school has adopted additional admissions criteria for MASc studies. Applicants must meet one of the following requirements:

• Baccalaureate degree in engineering or equivalent. Applicant must be a graduate from an honours engineering program with at least a 75% average in the past four full-time semesters or the equivalent. International degree and grade equivalents will be determined by the Office of Graduate and Postdoctoral Studies.

• Bachelor of Science degree or equivalent. At least a 75% average in the work of the last four full-time semesters or the last two complete undergraduate years of an honours science degree. Applicants must demonstrate acceptable analytical ability by having taken a sufficient number of courses in mathematics and the physical sciences (chemistry and physics). Applicants lacking background in specific topics related to their research project must be prepared to complete make-up undergraduate engineering courses without receiving graduate credit.

Program Requirements

The prescribed program of study must consist of no fewer than 2.0 credits, of which at least 1.0 must be engineering graduate courses. Of the remaining 1.0 credits, 0.5 credits must be at the graduate level, and the other 0.5 credits may be graduate credits or senior undergraduate engineering credits. Depending on the student’s background, the advisory committee may specify more than four courses, including undergraduate make-up courses. If make-up courses are deemed necessary, they will be considered additional courses.

MEng Program

The objective of the course-work master’s degree program (MEng) is to provide an opportunity for engineering graduates, usually practising engineers, to advance their understanding of engineering principles and increase their grasp of the application of these principles to the solution of complex, practical problems. Many of these students are returning to school in order to learn about recent technological developments that have occurred since graduation in their field. The objective is achieved through selecting from a number of core and elective courses and completing a major project. The project requires a final written report followed by an oral examination of the candidate.

Admission Requirements

Applicants must be graduates of an honours engineering program with at least a 70% average in the past four full semesters or the last two complete undergraduate years or the equivalent. International degree and grade equivalents will be determined by the Office of Graduate and Postdoctoral Studies.

Applicants must demonstrate acceptable analytical ability by having taken a sufficient number of courses in mathematics, and the physical sciences.

Biological Engineering applicants must have a minimum of three of the following courses or equivalents:

• Biological/Food/Bioprocess Engineering
• Engineering Unit Operations
• Bioreactor Design
• Bioinstrumentation Design
• Food Process Engineering Design
• Digital Process Control Design
• Heat and Mass Transfer
• Process Engineering
Computer Engineering applicants must have a minimum of three of the following courses or equivalents:

- Circuit Analysis
- Programming
- Digital Systems
- Microelectronics
- Computer Organization
- Telecommunications

Environmental Engineering applicants must have a minimum of three of the following courses or equivalents:

- Introduction to Environmental Engineering
- Engineering Unit Operations
- Water Quality
- Air Quality
- Solid Waste Management
- Water and Wastewater Treatment

Water Resources Engineering applicants must have a minimum of three of the following courses or equivalent:

- Fluid Mechanics
- Water Management
- Hydrology
- Water Quality
- Urban Water Systems
- Watershed Structures
- Soil and Water Conservation

Engineering Systems and Computing applicants must have a minimum of three of the following courses or equivalents:

- Electric Circuits
- Digital Systems
- Systems and Control Theory
- Programming
- Electronics
- Robotics

Mechanical Engineering applicants must have a minimum of three of the following courses or equivalents:

- Thermo-fluids
- Heat Transfer
- Solid mechanics
- Material science
- Dynamic System and controls
- Manufacturing processes
- Electrical circuits
- Machine Design
- Quality control
- Intelligent manufacturing

Applicant qualifications may be assessed via an entrance interview/oral examination conducted by the proposed advisor and one member of the School of Engineering Graduate Program Committee. Students deficient in certain areas will be required to take make-up undergraduate courses. Such students will be admitted and allowed to continue on provisional status for a maximum of two semesters or until the requirements are completed. These courses will not count toward the student’s graduate credit requirements.

Program Requirements

All incoming MEng students will be enrolled in the “Coursework” study option by default. If students wish to complete their degree via “Coursework and MRP,” they are encouraged to contact potential advisors within their first semester of study. Students will confirm their study option at the beginning of their second semester.

Coursework

Students must complete 4.5 credits according to the following:

1. 9 courses;
2. No more than 1.0 credits from senior undergraduate engineering courses;
3. No more than 1.0 credits from outside engineering; and
4. A minimum of 3.5 credits from engineering.

At least 2.5 credits of coursework must be field-specific (see the MEng section of the School of Engineering website for lists of courses). Remaining credits should be chosen in consultation with the Associate Director, Graduate Studies.

Coursework and Major Research Project (MRP)

Students must complete 4.5 credits according to the following:

1. 7 courses and the Final Project Course (1.0);
2. No more than 1.0 credits from senior undergraduate engineering courses;
3. No more than 1.0 credits from outside engineering; and
4. A minimum of 3.5 credits from engineering (including the Final Project Course).

At least 2.5 credits of coursework must be field-specific (see the MEng section of the School of Engineering website for lists of courses). Remaining credits should be chosen in consultation with the student’s advisor. For the final project course, one member of the graduate faculty will be nominated through discussion between the student and potential advisor(s) and approved by the Associate Director, Graduate Studies as the advisor.

PhD Program

The PhD program prepares candidates for a career in engineering teaching, research, or consulting. The program is designed to provide both broad knowledge of engineering science and training in advanced research. Doctoral research carries the expectation of making an original contribution to the body of existing knowledge or technology. It is also expected that the responsibility of problem definition and solution is that of the student, and that the student’s advisor acts truly in an advisory capacity. Therefore, graduates are expected to have acquired autonomy in defining and analysing problems, conducting research, and preparing scholarly publications. These objectives are achieved through a combination of course work, independent research, a qualifying examination, and the production and defence of a research dissertation.

Admission Requirements

The minimum academic requirement for admission to the PhD program is normally a recognized Master’s degree in engineering. Applicants are usually required to have completed a Bachelor’s and a Master’s
degree from a recognized post-secondary institution and must have achieved a minimum B average in their Master’s program. Applicants must also have demonstrated strong potential for research. A strong recommendation from the MASc advisor is necessary. Direct admission to the PhD program from a Bachelor’s program is rarely granted. Applicants requesting direct admission must hold a bachelor’s degree with exceptionally high academic standing and have related research experience. Such applicants should discuss this option with the Associate Director, Graduate Studies at the earliest opportunity.

Program Requirements
The prescribed program of study must consist of no fewer than 2.0 credits in addition to those taken as part of the MASc degree. At least 1.0 of the credits must be engineering graduate courses. Of the remaining 1.0 credits, 0.5 credits must be at the graduate level, and the other 0.5 credits may be graduate credits or senior undergraduate engineering credits. Depending on the student’s background, the advisory committee may specify more than 2.0 credits, including undergraduate make-up courses. If make-up courses are deemed necessary, they will be considered additional courses.

The qualifying examination as outlined in the Graduate Calendar is held by the end of the fourth semester but no later than the fifth semester after the student has completed the required courses.

Interdepartmental Programs
MSc Food Safety and Quality Assurance
The School of Engineering participates in the MSc program in food safety and quality assurance. Those faculty members whose research and teaching expertise includes aspects of food safety and quality assurance may serve as advisors for MSc students. Please consult the Food Safety and Quality Assurance (calendar.uoguelph.ca/graduate-calendar/graduate-programs/food-safety-quality-assurance/) listing for a detailed description of the MSc program.

Collaborative Specializations
International Development Studies
The School of Engineering participates in the MEng, MASc and PhD collaborative specialization in International Development Studies (IDS). The International Development Studies collaborative specialization provides an interdisciplinary framework for the study of international development combining training in a selected academic discipline with exposure to a broad range of social science perspectives. This collaborative specialization will add the designation “International Development Studies” to your program. Applicants apply directly through the School of Engineering and must meet the University of Guelph and department program admission requirements. Students should consult the International Development Studies (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/international-development-studies/) listing to confirm the IDS collaborative specialization requirements.

Artificial Intelligence
The School of Engineering participates in the collaborative specialization in Artificial Intelligence. MASc students wishing to undertake thesis research with an emphasis on artificial intelligence are eligible to apply to register concurrently in Engineering and the collaborative specialization. Students should consult the Artificial Intelligence (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/artificial-intelligence/) listing for more information.

One Health
The School of Engineering participates in the collaborative specialization in One Health. Master’s and Doctoral students wishing to undertake thesis research or their major research paper/project with an emphasis on one health are eligible to apply to register concurrently in Engineering and the collaborative specialization. Students should consult the One Health (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/one-health/) listing for more information.

Courses
ENGG*6000 Advanced Heat and Mass Transfer Unspecified [0.50]
Department(s): School of Engineering
Location(s): Guelph

ENGG*6010 Assessment of Engineering Risk Unspecified [0.50]
The question of “how safe is safe enough?” has no simple answer. In response, this course develops the bases by which we can assess and manage risk in engineering. Course deals with fate and transport issues associated with risk, as relevant to engineering and how these aspects are employed in the making of decisions.
Prerequisite(s): STAT*2040 or STAT*2120
Department(s): School of Engineering
Location(s): Guelph

ENGG*6020 Advanced Fluid Mechanics Unspecified [0.50]
Department(s): School of Engineering
Location(s): Guelph

ENGG*6030 Finite Difference Methods Unspecified [0.50]
Numerical solution of partial differential equations of flow through porous media; flow of heat and vibrations; characterization of solution techniques and analysis of stability; convergence and compatibility criteria for various finite difference schemes.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6050 Finite Element Methods Unspecified [0.50]
Department(s): School of Engineering
Location(s): Guelph

ENGG*6060 Engineering Systems Modelling and Simulation Unspecified [0.50]
A study of theoretical and experimental methods for characterizing the dynamic behaviour of engineering systems. Distributed and lumped parameter model development. Digital simulation of systems for design and control.
Department(s): School of Engineering
Location(s): Guelph
ENG*6070 Medical Imaging Unspecified [0.50]
Digital image processing techniques including filtering and restoration; physics of image formation for such modalities as radiography, MRI, ultrasound. Offered in conjunction with ENGG*4660. Extra work is required for graduate students.
Prerequisite(s): ENGG*3390
Restriction(s): Credit may be obtained for only one of ENGG*4660 or ENGG*6070.
Department(s): School of Engineering
Location(s): Guelph

ENG*6080 Engineering Seminar Unspecified [0.00]
The course objective is to train the student in preparing, delivering and evaluating technical presentations. Each student is required to: (a) attend and write critiques on a minimum of six technical seminars in the School of Engineering; and (b) conduct a seminar, presenting technical material to an audience consisting of faculty and graduate students in the school. This presentation will then be reviewed by the student and the instructor.
Department(s): School of Engineering
Location(s): Guelph

ENG*6090 Special Topics in Engineering Unspecified [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas which are applicable to several of the engineering disciplines in the School of Engineering.
Department(s): School of Engineering
Location(s): Guelph

ENG*6100 Machine Vision Unspecified [0.50]
Computer vision studies how computers can analyze and perceive the world using input from imaging devices. Topics covered include image pre-processing, segmentation, shape analysis, object recognition, image understanding, 3D vision, motion and stereo analysis, as well as case studies.
Department(s): School of Engineering
Location(s): Guelph

ENG*6110 Food and Bio-Process Engineering Unspecified [0.50]
Kinetics of biological reactions, reactor dynamics and design. Food rheology and texture; water activity and the role of water in food processing; unit operations design-thermal processing; and drying, freezing and separation processes.
Department(s): School of Engineering
Location(s): Guelph

ENG*6120 Fermentation Engineering Unspecified [0.50]
Modelling and design of fermenter systems. Topics include microbial growth kinetics, reactor design, heat and mass transfer. Instrumentation and unit operations for feed preparation and product recovery. Prerequisite: undergraduate course in each of microbiology, heat and mass transfer, and biochemistry or bioprocess engineering.
Department(s): School of Engineering
Location(s): Guelph

ENG*6130 Physical Properties of Biomaterials Unspecified [0.50]
Rheology and rheological properties. Contact stresses between bodies in compression. Mechanical damage. Aerodynamic and hydro-dynamic characteristics. Friction.
Department(s): School of Engineering
Location(s): Guelph

ENG*6140 Optimization Techniques for Engineering Unspecified [0.50]
This course serves as a graduate introduction into combinatorics and optimization. Optimization is the main pillar of Engineering and the performance of most systems can be improved through intelligent use of optimization algorithms. Topics to be covered: Complexity theory, Linear/Integer Programming techniques, Constrained/Unconstrained optimization and Nonlinear programming, Heuristic Search Techniques such as Tabu Search, Genetic Algorithms, Simulated Annealing and GRASP.
Department(s): School of Engineering
Location(s): Guelph

ENG*6150 Bio-Instrumentation Unspecified [0.50]
Department(s): School of Engineering
Location(s): Guelph

ENG*6160 Advanced Food Engineering Unspecified [0.50]
Application of heat and mass transfer, fluid flow, food properties, and food-processing constraints in the design and selection of food process equipment. Development of process specifications for the control of the flow of heat and moisture and the associated microbial, nutritional and organoleptic change in foods. Food system dynamics and process development.
Department(s): School of Engineering
Location(s): Guelph

ENG*6170 Special Topics in Food Engineering Unspecified [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of food engineering.
Department(s): School of Engineering
Location(s): Guelph

ENG*6180 Final Project in Biological Engineering Unspecified [1.00]
A project course in which a problem of advanced design or analysis in the area of biological engineering is established, an investigation is performed and a final design or solution is presented.
Restriction(s): This course is open only to students in the biological MEng program.
Department(s): School of Engineering
Location(s): Guelph

ENG*6190 Special Topics in Biological Engineering Unspecified [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of biological engineering.
Department(s): School of Engineering
Location(s): Guelph

ENG*6260 Colloids, Interfaces and Emulsions: Concepts and Practical Applications Winter Only [0.50]
This course focuses on the theory and the applications of colloid and interface science in the environmental, chemical, and food sectors. Major topics include the forces of interactions between colloids, the stabilization and destabilization of emulsions and foams, and polymeric fluids and gels.
Prerequisite(s): CHEM*1040 and CHEM*1050
Department(s): School of Engineering
Location(s): Guelph
ENGG*6270 Advanced Estimation Theory Winter Only [0.50]
This course provides a theoretical and practical understanding of advanced state and parameter estimation theory. Topics include, but are not limited to: linear and nonlinear models, system and measurement noise distributions, observers, optimal filters, robust strategies, and written communication skills. Students should have background knowledge in linear algebra, programming, and systems and control theory.

Prerequisite(s): ENGG*2400 or ENGG*3410
Department(s): School of Engineering
Location(s): Guelph

ENGG*6290 Special Topics in Mechanical Engineering Unscheduled [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of mechanical engineering.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6300 Research Methods in Bioengineering Unscheduled [0.50]
Research methodologies used in bioengineering are reviewed and assessed in the context of a diverse range of applications: biomechanics, control and instrumentation, ergonomics, diagnostic tools, biomaterials and food safety. The scientific method is discussed in terms of defining research problems, appropriate tests and hypotheses, experimental methods, data analysis and drawing conclusions. The objective is to guide students as they develop a coherent research proposal and deepen their understanding of the breadth of the discipline. (Offered in alternate years)
Restriction(s): Instructor consent required.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6310 Advanced Electromechanical Devices Unscheduled [0.50]
Course covers: switched reluctance motor, brushless motor, linear motor, axial flux motor, and harmonic drive motor with applicable actuators. Other topics introduced include: Electromagnetic micro power generation, design and analysis of cooling systems and control mechanism. Background in electromagnetism required. (Offered in alternate years)
Department(s): School of Engineering
Location(s): Guelph

ENGG*6320 Advanced Topics in Mechatronics Unscheduled [0.50]
This course covers materials related to mechatronics systems in terms of dynamics, control, sensing, estimation. The course covers advanced topics in these areas and provides students the tools to model, analyze, and control these systems. The focus is on vehicles and robots (mobile robots).
Department(s): School of Engineering
Location(s): Guelph

ENGG*6340 Bioenergy and Biofuels Unscheduled [0.50]
Theoretical and hands-on experience in bio-renewable energy areas prepares students from diverse backgrounds for a career in the biorefinery industry, academia, or entrepreneurial endeavors. Also deals with the technologies of converting biomass into upgraded energy, value added products, fuels, and chemicals. Thermodynamics background helpful.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6350 Flow Induced Vibrations Unscheduled [0.50]
Course covers fluid-structure interaction problems with an emphasis on analytical and numerical methods. Topics include vortex and turbulence induced vibration, galloping and flutter, fluid-elastic instability, and acoustic resonance. Various case studies and applications will be discussed. Background in fluid mechanics and vibrations required. (Offered in alternate years)
Department(s): School of Engineering
Location(s): Guelph

ENGG*6360 Fuel Cell Technology Unscheduled [0.50]
Examination of principles governing fuel cell technology and the technical challenges associated with developing fuel cell systems. Topics include the chemical thermodynamics and electrochemical kinetics of fuel cells, the evolution of fuel cell technology, and fuel cell system design. Background in materials and thermodynamics required.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6370 Heat Transfer in Porous Medium Unscheduled [0.50]
Course covers general conservation equations for studying the flow and heat transfer through porous media. Application and case studies of porous materials will be discussed. Modelling techniques will be shown for a particular application area. Background in Heat Transfer required. (Offered in alternate years)
Department(s): School of Engineering
Location(s): Guelph

ENGG*6380 Simulation Analysis of Discrete Event Systems Unscheduled [0.50]
Many complex engineering, operations, and business systems can be modeled as discrete-event systems. Efficient management and operation of these systems requires simulation to study their performance. Case studies and applications will be presented and discussed. (Offered in alternate years)
Department(s): School of Engineering
Location(s): Guelph

ENGG*6390 Final Project in Mechanical Engineering Unscheduled [1.00]
A project course in which a problem of advanced design or analysis in the area of mechanical engineering is established, an investigation is performed and a final design or solution is presented.
Restriction(s): Restricted to MENG.ENGG:L students.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6400 Mobile Devices Application Development Unscheduled [0.50]
This course provides an introduction to developing applications for mobile devices. The emphasis will be on the fundamentals of mobile application programming. This is primarily a project-based course in which the goal is to produce a working app by the end of the course. The purpose of this course is to create new inter-disciplinary applications of mobile devices. Graduate students from all disciplines at the University of Guelph are invited to take the course for credit.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6440 Advanced Biomechanical Design Unscheduled [0.50]
Biomechanical Design from concept through prototyping and testing. This course will investigate and apply techniques used for biomechanical design including reverse engineering, solid modelling, geometric tolerancing, testing and rapid prototyping. Instructor’s signature required.
Department(s): School of Engineering
Location(s): Guelph
ENGG*6450 Queueing Theory and Traffic Modeling Modeling
Data Unspecified [0.50]
Restriction(s): Instructor consent required.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6460 Engineering Leadership Winter Only [0.50]
This course introduces engineering students to leadership concepts and theory in the context of application to the engineering profession and practice. The focus is on developing practical leadership knowledge, skills and attitudes, starting from the personal level and extending to application in the organizations and society. The content is presented and assessed through a blend of lectures, readings, case studies, discussions, presentations, workshops, reflective practice and a major project.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6500 Introduction to Machine Learning Unspecified [0.50]
The aim of this course is to provide students with an introduction to algorithms and techniques of machine learning particularly in engineering applications. The emphasis will be on the fundamentals and not specific approach or software tool. Class discussions will cover and compare all current major approaches and their applicability to various engineering problems, while assignments and project will provide hands-on experience with some of the tools.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6510 Analog Integrated Circuit Design Unspecified [0.50]
In this course, operating principles and design techniques of analog integrated circuits are introduced with emphasis on device and system modelling. These circuits include analog and switched-capacitor filters, data converters, amplifiers, oscillators, modulators, circuits for communications, sensor readout channels, and circuits for integrated memories. It is recommended that students are familiar with the fundamentals of linear systems, circuit analysis, and electronic devices.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6520 VLSI Digital Systems Design Unspecified [0.50]
This course will introduce the principles of VLSI MOSFET digital design from a circuit and system perspective. Advanced topics include: power issues related to each level of design abstraction; voltage and frequency scaling; power to speed tradeoffs; ASIC digital design flow; Verilog integration/integration; ASIC case studies. It is recommended that students are familiar with the fundamentals of digital circuits and electronic devices.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6530 Reconfigurable Computing Systems Unspecified [0.50]
This course serves as a graduate introduction into reconfigurable computing systems. It introduces students to the analyses, synthesis and design of embedded systems and implementing them using Field Programmable Gate Arrays. Topics include: Programmable Logic devices, Hardware Description Languages, Computer Aided Design Flow, Hardware Accelerators, Hardware/Software Co-design techniques, Run Time Reconfiguration, High Level Synthesis. It is recommended that students are familiar with the fundamentals of digital design and hardware description languages.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6540 Advanced Robotics Unspecified [0.50]
This course is intended for graduate students who have some knowledge and interest in robotics. The course covers modelling, design, planning control, sensors and programming of robotic systems. In addition to lectures, students will work on a term project in which a problem related to robotics systems will be studied. Instructors signature required.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6550 Intelligent Real-Time Systems Unspecified [0.50]
Soft real-time systems, hard real-time systems, embedded systems, time handling and synchronization, deadlines, preemption, interruption, RTS languages, RTS/ operating systems, system life-cycle, petri nets, task scheduling and allocation, fault-tolerance, resource management, RTS/ search techniques, dealing with uncertainty.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6560 Advanced Digital Signal Processing Unspecified [0.50]
Discrete-time signals and systems, z transform, frequency analysis of signals and systems, fourier transform, fast fourier transform, design of digital filters, signal reconstruction, power spectrum estimation.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6570 Advanced Soft Computing Unspecified [0.50]
Neural dynamics and computation from a single neuron to a neural network architecture. Advanced neural networks and applications. Soft computing approaches to uncertainty representation, multi-agents and optimization.
Prerequisite(s): ENGG*4430
Department(s): School of Engineering
Location(s): Guelph

ENGG*6580 Advanced Control Systems Unspecified [0.50]
This course will start with state space analysis of multi-input multi-output control systems. Then state space design will be presented. After that, nonlinear control systems and soft computing based intelligent control systems will be studied. Finally, hybrid control systems, infinite control and uncertainty and robustness in control systems will be addressed.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6590 Final Project in Engineering Systems and Computing Unspecified [1.00]
A project course in which a problem of advanced design or analysis in the area of Engineering Systems and Computing is established by the student, an investigation is performed, and a report on the final design or solution selected is presented.
Restriction(s): Restricted to MENG.ENGG:L students.
Department(s): School of Engineering
Location(s): Guelph
ENGG*6600 Special Topics in Engineering Systems and Computing Unspecified [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of Engineering Systems and Computing.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6610 Urban Stormwater Management Unspecified [0.50]
Continuous stormwater management models and model structure. Catchment discretization and process disaggregation. Pollutant build-up, wash off and transport. Flow and pollutant routing in complex, looped, partially surcharged pipe/channel networks including pond storage, storage tanks, diversion structures, transverse and side weirs, pump stations, orifices, radical and leaf gates and transient receiving water conditions (including tides). Pollutant removal in sewer networks, storage facilities and treatment plants.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6630 Environmental Contaminants: Fate Mechanisms Unspecified [0.50]
Analysis of fate mechanisms associated with environmental contaminants. Focus on substances which are generally considered to be hazardous to humans, or other animal life at low concentrations. Study of physicochemical properties and fate estimation on control and remediation strategies. Quantitative analysis of contaminant partitioning and mass flows, including cross-media transport and simultaneous action of contaminant fate mechanisms.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6650 Advanced Air Quality Modelling Unspecified [0.50]
Analysis of analytical and computational models used to predict the fate of airborne contaminants; role of air quality models for the solution of engineering-related problems; analysis of important boundary layer meteorology phenomena that influence the fate of air pollutants; conservation equations and mathematical solution techniques; model input requirements such as emissions inventories; Gaussian models; higher-order closure models; Eulerian photochemical grid models.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6660 Renewable Energy Unspecified [0.50]
The engineering principles of renewable energy technologies including wind, solar, geothermal and biomass will be examined, including technology-specific design, economic and environmental constraints. Students will compare the relative merits of different energy technologies and gain a knowledge base for further study in the field.
Restriction(s): Restricted to MASC.ENGS, MENG and PHD.ENGG students.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6670 Hazardous Waste Management Unspecified [0.50]
This course will define the different types of hazardous wastes that currently exist and outline the pertinent legislation governing these wastes. Information will be presented on different ways to handle, treat and dispose the hazardous waste, including separation, segregation, minimization, recycling and chemical, physical, biological, and thermal treatment. Also to be discussed are hazardous waste landfills and site remediation technologies. Specifics include design and operation of hazardous landfill sites, handling and treatment of leachate, comparison of pertinent soil remediation technologies. Case studies will be reviewed.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6680 Advanced Water and Wastewater Treatment Unspecified [0.50]
This design course will discuss advanced technologies not traditionally covered during an undergraduate curriculum. An important consideration will be the reuse of water.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6740 Ground Water Modelling Unspecified [0.50]
Introduction to current groundwater issues, definition of terms, review of fundamental equations describing fluid and contaminant transport in saturated groundwater zones. Mathematical techniques (analytical, FE and FD) for the solution of the fundamental equations. Application of numerical groundwater models to a variety of situations. Case studies. Review of groundwater models used in industry.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6790 Special Topics in Environmental Engineering Unspecified [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of environmental engineering.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6800 Deterministic Hydrological Modelling Unspecified [0.50]
Department(s): School of Engineering
Location(s): Guelph

ENGG*6820 Measurement of Water Quantity and Quality Unspecified [0.50]
This course covers techniques used to measure rates of movement and amounts of water occurring as precipitation, soil water, ground water and streamflow. Available measurements of water quality are surveyed. Calculation procedures involved in the use of indirect indicators of water quantity and quality individually and in combination are described.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6840 Open Channel Hydraulics Unspecified [0.50]
Basic concepts, energy principle; momentum principle; flow resistance; non-uniform flow; channel controls and transitions; unsteady flow; flood routing.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6860 Stream and Wetland Restoration Design Unspecified [0.50]
Explores the multi-disciplinary principles of stream and wetland restoration and the tools and techniques for restoration design. Restoration design is approached from a water resources engineering perspective with emphasis on hydrological and hydraulic techniques. Numerous case studies are examined as a means to identify more successful design approaches.
Prerequisite(s): ENGG*3650
Department(s): School of Engineering
Location(s): Guelph
ENGG*6880  Soil Erosion and Fluvial Sedimentation  Unspecified  [0.50]
Students will be able to (i) describe processes related to soil erosion by water, (ii) describe processes related to fluvial sedimentation, (iii) evaluate and prescribe structural and non-structural control methods, and (iv) run at least one soil erosion/fluvial sedimentation computer model if the course is satisfactorily completed.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6900  Final Project in Water Resources Engineering  Unspecified  [1.00]
A project course in which an advanced design problem in the area of watershed engineering is established, a feasibility investigation performed and a final design presented.
Restriction(s): Restricted to MENG:L students.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6910  Special Topics in Water Resources Engineering  Unspecified  [0.50]
A course of directed study involving selected readings and analyses in developing knowledge areas of water resources engineering.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6950  Final Project in Environmental Engineering  Unspecified  [1.00]
A project course in which a problem of advanced design or analysis in the area of environmental engineering is established, an investigation is performed and a final design or solution is presented.
Restriction(s): Restricted to MENG:L students.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6980  Special Topics in Computer Engineering  Unspecified  [0.50]
This course addresses specialized topics in one or more aspects of Computer Engineering not covered by other graduate courses. Includes selected readings and thorough analyses in emerging knowledge areas, advanced engineering tools, and current technical developments. May be repeated for credit as topics vary.
Department(s): School of Engineering
Location(s): Guelph

ENGG*6990  Final Project in Computer Engineering  Unspecified  [1.00]
An independent project carried out under the supervision of a Computer Engineering faculty member in which an advanced modelling or design problem and the desired outcomes are defined, possible solutions are synthetized and analyzed, and a final model or design is evaluated. Regular meetings, final report, and presentation required.
Restriction(s): Restricted to MENG:L students.
Department(s): School of Engineering
Location(s): Guelph
