**GEOGRAPHY**

The Department of Geography, Environment and Geomatics offers programs of study leading to the degrees of MA, MSc and PhD in Geography in the following fields:

- Environmental Management and Governance
- Biophysical Systems and Processes
- Socio-Economic Spaces and Change

Details regarding faculty, areas of research, and current research opportunities are provided on the Department’s website (https://geg.uoguelph.ca/).

### Administrative Staff

**Chair**
Wanhong Yang (118a Hutt, Ext. 53090)
wayang@uoguelph.ca

**Graduate Program Coordinator**
Noella Gray (121 Hutt, Ext. 58155)
ggradcrd@uoguelph.ca

**Graduate Program Assistant**
Nance Grieve (123a Hutt, Ext. 56721)
geograd@uoguelph.ca

### Graduate Faculty

*This list may include Regular Graduate Faculty, Associated Graduate Faculty and/or Graduate Faculty from other universities.*

**Aaron Berg**
B.Sc., M.Sc. Lethbridge, M.Sc. UT Austin, PhD UC Irvine - Professor
Graduate Faculty

**Benjamin E. Bradshaw**
BA Trent, PhD Guelph - Associate Professor and Assistant Vice President (Graduate Studies)
Graduate Faculty

**Jaclyn Cockburn**
B.Sc., M.Sc., PhD Queen’s - Associate Professor
Graduate Faculty

**Ben DeVries**
B.Sc. Toronto, M.Sc., PhD Wageningen - Assistant Professor
Graduate Faculty

**Evan Fraser**
BA, M.Sc. Toronto, PhD British Columbia - Professor
Graduate Faculty

**Ze’ev Gedalof**
BA, M.Sc. Victoria, PhD Washington - Associate Professor
Graduate Faculty

**Noella Gray**
B.Sc. McGill, MA Western, PhD Duke - Associate Professor and Interim Associate Dean (Research and Graduate Studies) College of Social and Applied Sciences
Graduate Faculty

**Roberta Hawkins**
B.Sc. Queen’s, MES, MA York, PhD Clark - Associate Professor

### MA and MSc Programs

The Department of Geography, Environment and Geomatics offers MA and MSc degrees in Geography, by thesis and by project. The Master's program offers opportunities for research in the fields of:

1. environmental management and governance;
2. biophysical systems and processes; and
3. socio-economic spaces and change.

The program is distinctive in that it emphasizes interrelationships among biophysical and human systems. Scales of inquiry range from the local to the global, and students conduct research in Canada as well as internationally. In addition, the department offers a Master of Conservation Leadership (calendar.uoguelph.ca/graduate-calendar/graduate-programs/conservation-leadership/).
Admission Requirements
To be considered for admission, applicants should meet the minimum requirements of a four-year honours degree with a 75% ('B') average during the final two years of study. Applicants must submit a statement of their research interests with their application. It is essential that applicants contact potential advisors in the department prior to submission of an application. Students are admitted in September. Program offices should be consulted for admission deadlines.

Program Requirements
Students enrol in one of two study options:
1. thesis, or
2. course work and major research project.

Thesis
Students taking the thesis option are required to complete an acceptable thesis and the Research Methods courses (GEOG*6090 Geographical Research Methods I and GEOG*6091 Geographical Research Methods II). In addition, students must take three courses (1.5 credits), from the Department of Geography.

For the MA degree, students must complete two courses identified as social science courses. For the MSc degree, students must complete two courses identified as biophysical science courses.

Course Work and Major Research Project (MRP)
Students taking the course work option must complete the Research Methods courses (GEOG*6090 Geographical Research Methods I and GEOG*6091 Geographical Research Methods II) and the Research Project course (GEOG*6180 Research Project in Geography). In addition, five other courses (2.5 credits) are required, at least four of which must be from the Department of Geography. MA students must complete three courses identified as social science courses. MSc students must complete three courses identified as biophysical science courses.

PhD Program
The PhD program is offered in three fields:
1. environmental management and governance;
2. biophysical systems and processes; and
3. socio-economic spaces and change.

Doctoral students conduct research relating to these areas at various geographic scales, from the local to the global.

Admission Requirements
Applicants for the PhD program should have a recognized master’s degree with an 80% ('A-') average in their postgraduate studies. Applicants must submit a statement of their research interests including some evidence of experience in their chosen research area. It is essential that applicants contact potential advisors in the department prior to submission of an application. Students are admitted in September. Program offices should be consulted for admission deadlines.

Program Requirements
All students in the PhD program are required to complete the Geographic Scholarship and Research course (GEOG*6100 Geographic Scholarship and Research) during the first two semesters of study. The advisory committee may prescribe additional courses to help the student prepare for the qualifying examination and thesis research. All students in the PhD program must complete a qualifying examination and submit a satisfactory research proposal by the end of the fourth semester of study.

The qualifying examination has written and oral components and evaluates the student’s knowledge of the broader scholarly field as well as the specific theoretical and empirical content of the intended research area. Submission and defence of an acceptable thesis on an approved topic completes the requirements of the PhD.

Collaborative Specializations

International Development Studies
The Department of Geography participates in the MA, MSc and PhD collaborative specialization in International Development Studies (IDS). Consult the International Development Studies (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/international-development-studies/) listing for a detailed description of the requirements of the collaborative specialization.

One Health
The Department of Geography participates in the collaborative specialization in One Health. Master's and Doctoral students wishing to undertake thesis research or their major research paper/project with an emphasis on one health are eligible to apply to register concurrently in Geography and the collaborative specialization. Students should consult the One Health (calendar.uoguelph.ca/graduate-calendar/collaborative-specializations/one-health/) listing for more information.

Courses
GEOG*6060 Special Topics in Geography Summer, Fall, and Winter [0.50]
A course on some specific topic not covered by the regular graduate courses for which there are both available faculty and sufficient interest among students.

Restriction(s): Instructor consent required.
Department(s): Department of Geography
Location(s): Guelph

GEOG*6090 Geographical Research Methods I Fall Only [0.50]
A review of philosophies and research methods in geography. The development and presentation of a context paper for the thesis or research project.

Department(s): Department of Geography
Location(s): Guelph

GEOG*6091 Geographical Research Methods II Winter Only [0.50]
A review of philosophies and research methods in geography. The development and presentation of a research proposal for the thesis or research project.

Prerequisite(s): GEOG*6090
Department(s): Department of Geography
Location(s): Guelph

GEOG*6100 Geographic Scholarship and Research Fall and Winter Reg Required [0.50]
A review of geographic scholarship including conceptual, theoretical and methodological issues in resource assessment, biophysical resources and rural socio-economic resources.

Offering(s): The course extends over two semesters (Fall and Winter).
Department(s): Department of Geography
Location(s): Guelph
GEOG*6180 Research Project in Geography  
Summer, Fall, and Winter  [1.00]
The preparation and presentation of a report on the research project approved in GEOG*6091.  
Restriction(s): Instructor consent required.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6281 Environmental Management and Governance  
Fall Only  [0.50]
Analysis and evaluation of environmental management and governance using geographical approaches. Emphasis is on socio-economic theories, concepts and methods which offer a more comprehensive and integrative basis for understanding environmental decisions.  
Restriction(s): Restricted to Geography students.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6330 Biotic Processes and Biophysical Systems  
Unspecified [0.50]
Investigation of biotic processes influencing the composition, structure and distribution of plant and animal communities and of approaches to biophysical systems analysis, focusing on environmental system interaction at the landscape scale.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6340 Human-Environment Relations  
Winter Only  [0.50]
A critical review of philosophies, concepts and analytical methods for analysis and management of systems involving the interaction of environmental processes and human spatial activity.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6450 Development Geography  
Unspecified [0.50]
Group identities at various scales in relation to concepts of territory and territoriality, and their changing impact on the world's political map.  
Offering(s): Offered in alternate years.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6550 Environmental Modelling  
Winter Only  [0.50]
This course aims to provide students with an understanding of the processes and techniques involved in environmental modeling practice and will focus on the power and limitations of existing models.  
Department(s): Department of Geography  
Location(s): Guelph  

GEOG*6610 Global Hydrology  
Fall Only  [0.50]
An examination of global environmental hydrology including precipitation, evaporation, subsurface water and runoff. Physical processes, measurement, analytical techniques and modelling strategies will be considered in the context of global change.  
Department(s): Department of Geography  
Location(s): Guelph
