Specific Subject Requirements and Recommendations

Specific subject requirements for the following degree programs offered by the University of Guelph are listed below:

- Bachelor of Applied Science
- Bachelor of Arts
- Bachelor of Arts and Sciences
- Bachelor of Bio-Resource Management
- Bachelor of Commerce
- Bachelor of Computing
- Bachelor of Engineering
- Bachelor of Indigenous Environmental Science and Practice
- Bachelor of Landscape Architecture
- Bachelor of Science
- Bachelor of Science in Agriculture
- Bachelor of Science in Environmental Sciences
- Doctor of Veterinary Medicine

Specific subjects are listed under the current Ontario Secondary School Curriculum. If an applicant has completed two courses which are deemed to be equivalent, only one will be used in calculating the admission average (e.g. OAC English and 4U English). The Non-Academic component of 4U/M co-op courses is not accepted as a contribution to admission requirements.

Out of province applicants should visit [http://admission.uoguelph.ca/outofprov/](http://admission.uoguelph.ca/outofprov/) for applicable subject requirements. Students applying with educational credentials obtained outside of Canada should consult [http://admission.uoguelph.ca/equivalency/](http://admission.uoguelph.ca/equivalency/).

### Bachelor of Applied Science (B.A.Sc.)
**Child Studies; Family Studies and Human Development**
- ENG4U; one 4U Mathematics course; one of SBI4U, SCH4U or PSK4U; three additional 4U or 4M courses.

**Applied Human Nutrition**
- ENG4U; one 4U Mathematics course; SBI4U; SCH4U; two additional 4U or 4M courses.

**Recommendations and Notes**
Biology (SBI4U) is recommended for students pursuing a major in Child Studies or Family Studies and Human Development.

### Bachelor of Arts (B.A.)
- ENG4U; five additional 4U or 4M courses.

**Recommendations and Notes**
Completion of MHF4U is highly recommended prior to enrolling in Economics; Food, Agricultural and Resource Economics; Mathematical Economics or Mathematical Science. These majors require knowledge in math.

Completion of a 4U Mathematics course is recommended for students pursuing any other Social Science major.

### Bachelor of Arts and Sciences (B.A.S.)
- ENG4U; MHF4U; two of SBI4U, SCH4U or SPH4U; one 4U or 4M Arts or Social Studies; one additional 4U or 4M course.

**Recommendations and Notes**
Arts and Social Studies courses include language and literatures, performing arts, social sciences, geography and history.

### Bachelor of Bio-Resource Management (B.B.R.M.)
**Environmental Management; Equine Management**
- ENG4U, SBI4U and four additional 4U/M courses.

**Equine Management**
- ENG4U, SBI4U, SCH4U, and one of MHF4U, MCV4U or MDM4U and two additional 4U or 4M courses.

**Food Industry Management**
- ENG4U; MHF4U; SBI4U; SCH4U; and two additional 4U or 4M courses.

### Bachelor of Commerce (B.Comm.)
**Accounting; Food and Agricultural Business; Management; Marketing Management; Management Economics and Finance; Real Estate; Sport and Event Management and Undeclared**
- ENG4U; MHF4U; one additional 4U Mathematics course, three additional 4U or 4M courses.

**Hospitality and Tourism Management; Government, Economics and Management**
- ENG4U; MHF 4U; four additional 4U or 4M courses.

### Bachelor of Computing (B.Comp.)
- ENG4U; MCV4U; four additional 4U or 4M courses.

### Bachelor of Engineering (B.Eng.)
- ENG4U; MHF4U; MCV4U; two of SBI4U, SCH4U or SPH 4U; one additional 4U or 4M course.

**Recommendations and Notes**
1. All applicants are advised to include both Physics and Chemistry in their 4U courses.
2. Effective for the Fall 2022 entry point, subject requirements will include ENG4U; MHF4U; MCV4U; SCH4U; SPH4U; one additional 4U/ M course.
3. Applicants are considered on the basis of academic performance and a review of a Student Profile Form, if submitted. Differential criteria may prevail for admission to the various B.Eng. programs. Students who are admitted but lack one of the three 4U science courses must complete a replacement course, as required, available at the University. These courses do not count towards the 23.50 credits required for the B.Eng. program. Students intending to enrol in these courses should consult the timetable and Chapter XII of the Calendar to determine the semesters during which they are offered.

4. Applicants who lack one specific subject requirement but who have a high overall academic standing may be considered for admission to the regular (non-coop) program. Replacement credits are available at the University of Guelph.

5. Students selecting a major in Environmental, Biological, Biomedical or Water Resources Engineering are advised to include Physics, Chemistry and Biology in their 4U courses. Students intending to major in Mechanical Engineering, Computer Engineering, or Engineering Systems and Computing should include Physics, Chemistry and Computer Studies in their 4U courses.

Bachelor of Indigenous Environmental Science and Practice (B.I.E.S.P.)
- ENG4U; MHF4U; SBI4U; SCH4U; and two additional 4U or 4M courses.

Bachelor of Landscape Architecture (B.L.A.)
- ENG4U; five additional 4U or 4M courses.

Recommendations and Notes
Applicants are required to complete a Background Information Form (BIF). A breadth of courses in the social, physical and biological sciences as well as the arts and languages is encouraged for all applicants.

Bachelor of Science (B.Sc.)

Biological Sciences
- ENG4U; MHF4U; two of SBI4U, SCH4U or SPH4U, two additional 4U or 4M courses.

Physical Sciences
- ENG4U; MCV4U; two of SBI4U, SCH4U or SPH4U, two additional 4U or 4M courses.

Recommendations and Notes
It is highly recommended that students select one of the two additional courses bearing in mind:

- Their eventual specialization.
- Regulation I on Introductory Courses, Chapter IX-B.Sc. Applicants who lack one specific 4U requirement but who have a high overall academic standing may be considered for admission to the regular (non-coop) program.
- Applicants are advised to include Biology, Chemistry and Physics among their 4U courses.

Bachelor of Science in Agriculture (B.Sc. (Agr.))
- ENG4U; MHF4U; two of SBI4U, SCH4U or SPH4U, two additional 4U or 4M courses.

Recommendations and Notes
Applicants are advised to include Biology and Physics among their 4U courses.

Bachelor of Science in Environmental Sciences (B.Sc. (Env.))
- ENG4U; MHF4U; two of SBI4U, SCH4U or SPH4U, two additional 4U or 4M courses.

Recommendations and Notes
Applicants are advised to include Biology and Physics among their 4U courses.

Students who lack any one specific subject requirement but who have a high overall academic average may be considered for admission to the regular (non-coop) program. Students who are admitted with a deficiency in one of the secondary school requirements are encouraged to seek advice from their academic or admission counsellor. This deficiency must be resolved in the first year of the program.

Doctor of Veterinary Medicine (D.V.M.)
The class size in the Doctor of Veterinary Medicine (D.V.M.) Program is limited to approximately 120 students.

Academic Requirements
Applicants must present a minimum of four full-time semesters (10.00 credits), and specific prerequisite courses:

1. Biological Sciences - 1.00 credit (2 semester courses or 1 full-year course, with recommended emphasis on Animal Biology)
2. Cell Biology - 0.50 credit (1 semester course)
3. Genetics - 0.50 credit (1 semester course)
4. Biochemistry - 0.50 credit (1 semester course)
5. Statistics - 0.50 credit (1 semester course)
6. Humanities or Social Sciences - 1.00 credit* (2 semester courses or 1 full-year course)

* Students entering the D.V.M. Program should be able to operate across discipline boundaries recognizing the relevance of the humanities and the social sciences to their career choice. In selecting these courses from among those acceptable, the prospective veterinary student should consider topics such as ethics, logic, critical thinking, determinants of human behaviour and human social interaction.

Applicants must complete prerequisite courses within full-time acceptable semesters (e.g. 2.50 credits at the University of Guelph).

Recommendations and Notes
- To be eligible to apply for September 2021 entry to the D.V.M. program, applicants must have completed a minimum of four full-time semesters and all prerequisite courses at a recognized university before December 31, 2020.
Please refer to the 2021 D.V.M. application and required document deadline dates at: http://www.ovc.uoguelph.ca/recruitment/en/index.asp (http://www.ovc.uoguelph.ca/recruitment/en/)

All courses must be at the university level. Applicants should consult the list of acceptable University of Guelph courses and prerequisite subjects online at http:// (http://www.ovc.uoguelph.ca/recruitment/en/) www.ovc.uoguelph.ca/recruitment/en/index.asp (http://www.ovc.uoguelph.ca/recruitment/en/). Courses do not need to need not be completed in a specialized college or faculty, or in a designated Pre-Veterinary program. Any student who has attended university and completed two years of a full-time bachelor’s degree and fulfilled the DVM admission entry requirements can apply to the D.V.M. program at the Ontario Veterinary College.

Graduate Cohort
Applications will also be considered from persons who have successfully completed a graduate program and from persons currently enrolled in a graduate program. For applicants currently enrolled in a graduate program, all requirements of the program must be successfully completed by August 1st of the year of entry to the D.V.M. Program. Applicants who qualify must indicate their desire to be considered in the graduate cohort. Their application will then be removed from the undergraduate applicant pool and considered with the graduate applicant pool. Selection for interviews will be made on the basis of academic achievement including grades in acceptable prerequisite subjects (undergraduate and graduate courses), evaluation of the Background Information Form, two letters of reference from persons assessing the applicant’s skills and knowledge of veterinary medicine and two letters of reference from persons familiar with the applicant’s performance as a graduate student. Final selection will be based on this information and an interview. Normally, a maximum of five students will be selected from this cohort each year.

Because of limitations in class size, all candidates should have an alternative career objective and course selection should be compatible with this objective.

Residence Requirements
Canadian citizens or individuals who have Permanent Resident Status of at least one year’s duration are eligible to apply as domestic students if they also satisfy the Ontario residency requirement. ‘Resident’ in this context is interpreted to mean someone who has resided in Ontario for twelve months, exclusive of time spent in post-secondary institutions.

Selection Criteria
Since the number of applicants who satisfy the specific course requirements exceeds the number of available spaces in the D.V.M. Program, the Admissions Sub-Committee may use the following criteria to determine those who will be admitted. The members of the Sub-Committee endeavour to select those well-qualified applicants who, in their judgement, will be best able to successfully complete the veterinary medicine curriculum and who exhibit potential to become competent, responsible veterinarians dedicated to a lifetime of productive public service and continued learning. Candidates should pay attention to the selection criteria and attributes required for entry into the D.V.M. Program and use this information to guide them in preparation for application.

1. Academic Achievement and Aptitude
   In view of the need to efficiently and quickly learn large amounts of factual material and to solve problems, applicants must have demonstrated achievement in the comprehension of scientific material. This will be evaluated by the scrutiny of transcripts of previous academic records. Attention will be paid to both the quality and consistency of grades in the program presented as preparation for admission, particularly for those applicants who have spent more than the minimal time in preparation. Course selections in an applicant’s last two full-time semesters will be reviewed for academic coherence. For the purpose of D.V.M. admissions, a full-time semester will include at least 5 half-year courses (2.50 credits) from the acceptable list. It is expected that the level of an applicant’s courses will correspond to the semester level (year) of their program. Please refer to information regarding acceptable courses at: http://www.ovc.uoguelph.ca/recruitment/en/applyingtodvm/Academicrequirements.asp.

2. Animal and Veterinary Experience
   As part of the application process, candidates must demonstrate sufficient knowledge of the profession, its dimensions and the industries it serves to permit the candidate to make and defend their career choice. This requires the candidate to spend adequate time under the supervision of veterinarians in clinical practice situations (volunteer or paid) in order to gain hands-on experience with a range of animal species. Practice situations include, but are not limited to, large, small, mixed, avian and exotic animal clinics; thus introducing the applicant to food producing, companion, zoo and wildlife animals, or aquaculture. Other work or volunteer experience with veterinarians can include non-practice situations such as industry (e.g. veterinary products, pharmaceutical), research and academia (universities), and government (e.g. public health, regulatory affairs). There is an expectation that candidates will be able to demonstrate for each animal or veterinary experience the role of the veterinarian, production and breeding systems, general features of housing and feeding, productivity measures and norms, marketing systems, animal behaviour relevant to restraint, feeding and reproduction, and emerging trends and issues in the industry.

3. Background Information and Referees’ Assessments
   Successful candidates should have integrity, reliability, maturity and determination. It is important that professionals have excellent communication and leadership skills, and that they have a talent for effectively working with others. To assist in identification of candidates who possess these and other attributes, applicants must complete a Background Information Form, in which they will describe their academic program, work experience and extra-curricular activities. In addition, applicants will be asked to write a short essay about why they wish to study veterinary medicine. Confidential referee reports will be required from three persons qualified to give unbiased, informed, critical assessments of the applicant. A minimum of two of the three references that applicants select must be veterinarians with whom they have obtained animal and veterinary experience in the fulfillment of the selection criteria outlined in Section 2.

4. Interviews
   Applicants may be invited to an interview. The format of the interview will be available on the DVM admission website for each cohort of applicants. The purpose of the interview will be to explore a candidate’s ability to think on their feet, communicate opinions and ideas, critically appraise information and demonstrate advanced thought/knowledge of the issues facing the profession. The interview is intended to reflect the educational goals and objectives of OVC as well as the skills identified by the veterinary profession in Ontario as being necessary for a successful career. All interviews are held at the University of Guelph (no exceptions can be made).
Additional Attributes Required for Entry into the D.V.M. Program

Applicants should be aware that a number of attributes are required for admission to the Program. In addition to those already identified above under Selection Criteria (e.g. academic achievement, academic aptitude, integrity) a number of others, some of which relate to certain University of Guelph Learning Objectives, have been identified. These are presented here to assist prospective candidates in preparing themselves for admission.

1. Literacy and Numeracy

Literacy and numeracy are the bases on which all knowledge is founded. The ability to read, write, and calculate are fundamental intellectual tools. Students entering the D.V.M. Program will be able to demonstrate literacy skills at least to the basic level as described under Literacy in the University of Guelph Learning Objectives. They will be able to assimilate and comprehend written language at a basic level, to summarize information in a coherent manner, and use appropriate language in context. Successful applicants must be able to devise a topic or concept for discussion, frame its bounds and communicate its content.

Students entering the D.V.M. Program will understand the value and principles of describing situations in numeric terms. They will be able to assimilate and comprehend numeric data and use appropriate tools to manage such information. They must be able to use skills of numeracy to check validity of information, to use and correctly interpret appropriate statistics to describe the distribution of observations in individuals and populations, and be able to perform basic tests of hypotheses (t-test, chi-square and simple regression) and interpret these correctly.

2. Communication Skills

Communication is the process of interacting with others respectfully and involves an exchange of information, feelings and values. It includes intrapersonal communication (self-understanding, self-evaluation, and reasoning) and interpersonal communication (interaction with others, relationship and self-disclosure). Through interpersonal communication, relationships are started, maintained, or destroyed. Good communication involves an understanding of self-awareness, of self-esteem, of feelings and emotions, the development of listening skills and the willingness to disclose oneself truthfully and freely. Good communication also requires an understanding of principles of language and verbal interaction, principles of non-verbal communication, and of interpersonal communication and relationships (relationship development and deterioration, improvement of interpersonal communication, conflict management, interviewing skills etc.)

Students entering the D.V.M. Program will be able to: listen respectfully and comprehend appreciatively; practice the elements of good interpersonal communication successfully; demonstrate the ability to work cooperatively; and communicate effectively by oral, written, and electronic means at the appropriate literacy level. Successful applicants will be able to recognize the non-verbal aspects of communication by considering feelings, emotions, and values as elements of communication.

3. Judgement

Students entering the D.V.M. Program will be able to use knowledge, observational and analytical skills, with due consideration of value systems, to evaluate and implement decisions. They will be able to identify and articulate their personal value system; identify ethics and standards of conduct; and identify the values and assumptions that may be operative in various contexts. They must be able to identify, critically evaluate and accept the implications and consequences of decisions, to re-evaluate decisions based on new information, and deal effectively with uncertainty. They will be able to accept that self-assessment of ethics and standards of conduct are a professional responsibility, and accept that others may have different values and assumptions and respect those differences.

4. On-Going Curiosity (self-initiated learning)

Students entering the D.V.M. Program must be able to use self-initiated learning to maintain and enhance depth and breadth of understanding. They must recognize limitations of their knowledge, skills and attitudes, identify sources of ongoing learning opportunities, and demonstrate a commitment to on-going learning and self-evaluation.

5. Forms of Inquiry

Students entering the D.V.M. Program will be able to identify and articulate the strengths and weaknesses, similarities and differences of various forms of inquiry (i.e. those used by the physical scientist, the biological scientist, the social scientist and the scholar of the humanities). They will be able to describe and apply the scientific method, and articulate and evaluate personal problem-solving processes.

6. Essential Skills and Abilities

Application Procedures

Applicants currently or previously registered at the University of Guelph should apply through the Application for Internal Transfer or Readmission. All other domestic applicants, including those with dual Canadian citizenship, must apply through the Ontario Universities’ Application Centre OUAC 105 (https://www.ouac.on.ca/) application.

International applicants should apply through the Veterinary Medical College Application Service (VMCAS). (https://www.aavmc.org/becoming-a-veterinarian/how-to-apply/) Alternatively, international applicants can apply using the University of Guelph International Application (https://admission.uoguelph.ca/intl/app/).

Application Deadline Dates

The application deadline for Canadian citizens and permanent residents of Canada is December 1, 2020.

Please refer to deadline dates for supporting documentation including, references, official transcripts and the Background Information Form at: http://www.ovc.uoguelph.ca (http://www.ovc.uoguelph.ca/).

The application deadline for International applicants using the VMCAS application is September 15. Those applying directly to the University of Guelph are advised to apply and submit all supporting documentation by October 1.
Application Limitation
In total, only four applications for admission to the D.V.M. Program will be considered from an individual.

Requests for Deferrals
Requests for deferral of admission to the D.V.M. program will not be permitted except on approval by the Admissions Committee due to significant medical, psychological or compassionate reasons.

Rabies Immunization
A condition of admission to the D.V.M. Program is agreement to a rabies immunization program which includes blood titre evaluation.

Use of Animals
Live animals may be used for teaching purposes in some courses in the Veterinary Program, and this must be accepted by students admitted to the program. All animals are protected by the Animals for Research Act of Ontario (1980), the Guidelines for the Care and Use of Experimental Animals (Canadian Council on Animal Care), and the Animal Care Policies of the University of Guelph.

University of Guelph-Humber Programs
Admission requirements for University of Guelph-Humber programs are listed at: University of Guelph-Humber (calendar.uoguelph.ca/guelph-humber-calendar/)
