

CHEMISTRY (CHEM)

CHEM*1040 General Chemistry I Fall and Winter (LEC: 3, LAB: 3) [0.50]

This course introduces concepts of chemistry, the central link between the physical and biological sciences. Principles discussed include chemical bonding, simple reactions and stoichiometry, chemical equilibria and solution equilibria (acids, bases, and buffers), and introductory organic chemistry.

Prerequisite(s): 4U Chemistry (or equivalent) or CHEM*1060

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*1050 General Chemistry II Fall and Winter (LEC: 3, LAB: 3) [0.50]

This course provides an introductory study of the fundamental principles governing chemical transformations: thermodynamics (energy, enthalpy, and entropy); kinetics (the study of rates of reactions); and redox/ electrochemistry.

Prerequisite(s): CHEM*1040

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*1060 Introductory Chemistry Fall Only (LEC: 3) [0.50]

This course stresses fundamental principles of chemistry and is designed for students without Grade 12 or 4U Chemistry or equivalent. Topics include: atomic theory, the periodic table, stoichiometry, properties of gases and liquids, acid-base concepts and chemical equilibria. This course is intended only for students who require the equivalent of Grade 12 or 4U Chemistry in order to proceed to CHEM*1040.

Offering(s): Offered through Distance Education format only.

Restriction(s): CHEM*1040

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2060 Structure and Bonding Fall Only (LEC: 3, LAB: 1.5) [0.50]

This course covers the applications of symmetry, simple crystal structures and principles of bonding. Molecular orbital theory is used to explain the fundamental relationship between electronic and molecular structure. This course provides the elementary quantum background for an understanding of the electronic structures of atoms and molecules.

Prerequisite(s): CHEM*1050, [IPS*1510 or (MATH*1210, (1 of PHYS*1010, PHYS*1070, PHYS*1300))]

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2070 Structure and Spectroscopy Winter and Summer (LEC: 3, LAB: 1.5) [0.50]

This course provides an introduction to spectroscopy and its relationship to molecular structure and dynamics. Rotational, vibrational, electronic and magnetic resonance spectroscopies will be studied. Concepts introduced in CHEM*2060 will be applied to chemical and biochemical problems through spectroscopic techniques. Central to this course is the use of spectroscopy for the determination of molecular structures and the investigation of molecular motions.

Prerequisite(s): CHEM*2060

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2400 Analytical Chemistry I Summer, Fall, and Winter (LEC: 3, LAB: 6) [0.75]

This course provides instruction in quantitative analysis of important inorganic species in solution by volumetric, gravimetric and spectrophotometric techniques. The students will utilize spreadsheet applications to study solution equilibria and data analysis. This course is intended to build the foundations of good analytical laboratory practice.

Prerequisite(s): CHEM*1050

Restriction(s): CHEM*2480. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2480 Analytical Chemistry I Summer, Fall, and Winter (LEC: 3, LAB: 3) [0.50]

This course consists of a lecture portion that is the same as CHEM*2400 and a 3 hour laboratory component.

Prerequisite(s): CHEM*1050

Restriction(s): CHEM*2400 This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations or semester levels during certain periods. Please see the department website for more information.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2700 Organic Chemistry I Winter and Summer (LEC: 3, LAB: 3) [0.50]

This course provides an introduction to organic chemistry through the discussion of stereochemistry and major reaction mechanisms such as nucleophilic substitution and elimination, electrophilic addition, free radical reactions, electrophilic aromatic substitution, nucleophilic addition and nucleophilic acyl substitution.

Prerequisite(s): CHEM*1050

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2720 Fundamental Organic Chemistry Unspecified (LEC: 3) [0.50]

This course provides an introduction to organic chemistry through the discussion of stereochemistry and major reaction mechanisms such as nucleophilic substitution and elimination, electrophilic addition, free radical reactions, electrophilic aromatic substitution, nucleophilic addition and nucleophilic acyl substitution. This course is not acceptable for BSCH students in CHEM, BPCH, or BIOC, or for students in MBG or BTOX majors who intend to enroll in CHEM*3750 as a restricted elective. This course is intended for students who do not plan to enroll in any further organic chemistry courses.

Offering(s): This course is not offered every year.

Prerequisite(s): CHEM*1050

Restriction(s): CHEM*2700

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2820 Thermodynamics and Kinetics Fall Only (LEC: 3, LAB: 3) [0.50]

This course examines the laws and applications of chemical thermodynamics and chemical kinetics.

Prerequisite(s): CHEM*1050, (1 of IPS*1510, MATH*1210, MATH*2080)

Restriction(s): CHEM*2880, PHYS*2240

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*2880 Physical Chemistry Fall Only (LEC: 3, LAB: 1.5) [0.50]

This survey course is intended for students who are not specializing in chemistry or chemical physics. Topics include basic thermodynamics, chemical equilibrium, macromolecular binding, chemical kinetics, enzyme kinetics, transport processes, colligative properties and spectroscopy.

This course describes macroscopic observable properties of matter in terms of molecular concepts.

Prerequisite(s): CHEM*1050, (1 of IPS*1500, MATH*1000, MATH*1080, MATH*1200)

Restriction(s): CHEM*2820

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3360 Environmental Chemistry and Toxicology Winter and Summer (LEC: 3) [0.50]

This course examines the chemistry of the natural environment and the influence of pollutants upon the environment. Topics will include methods of introduction of pollutants to, and removal of pollutants from, the environment. (Also listed as TOX*3360.)

Offering(s): Also offered through Distance Education format.

Prerequisite(s): CHEM*1050

Equate(s): TOX*3360

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3430 Analytical Chemistry II: Instrumental Analysis Summer, Fall, and Winter (LEC: 3, LAB: 3) [0.50]

This course is designed to introduce students to modern methods of instrumental analysis in analytical chemistry. The focus of the course is on trace analysis, and therefore methods for the identification, separation and quantification of trace substances in solids, liquids and vapors will be described. The course is intended to build the foundations of good laboratory practice with good understanding of new concepts and principles of instrumental chemical analysis.

Prerequisite(s): (CHEM*2400 or CHEM*2480)

Restriction(s): TOX*3300. This is a Priority Access Course. Enrolment may be restricted to particular programs or specializations. See department for more information.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3440 Analytical Chemistry III: Analytical Instrumentation Fall Only (LEC: 3, LAB: 3) [0.50]

Analytical Instrumentation, data acquisition, processing and applications in Chemistry and Biological Chemistry.

Prerequisite(s): CHEM*3430

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3640 Chemistry of the Elements I Fall Only (LEC: 3, LAB: 3) [0.50]

A comprehensive introduction to concepts used by inorganic chemists to describe the structure, properties, and reactivity of compounds of the main group elements. The most important concepts covered are: Electronic Structure of Atoms, Symmetry, MO theory, Acids and Bases, Structure of Solids, Trends in the Periodic System.

Prerequisite(s): CHEM*2070

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3650 Chemistry of the Elements II Winter Only (LEC: 3, LAB: 3) [0.50]

The chemistry and structure of transition metal compounds; electronic spectral and structural properties of transition metal complexes; mechanisms of their substitution and redox reactions. Introduction to organometallic chemistry.

Prerequisite(s): CHEM*3640

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3750 Organic Chemistry II Summer and Fall (LEC: 3, LAB: 3) [0.50]

This course provides continued coverage of fundamental aspects of organic chemistry using an assimilation of carbonyl chemistry, unsaturated systems and carbon-carbon bond forming processes to acquaint students with methods of organic synthesis. Topics also include an introduction to spectroscopic methods for the identification of organic compounds.

Prerequisite(s): CHEM*2700

Restriction(s): This is a Priority Access Course. Enrolment may be restricted to particular programs, specializations or semester levels during certain periods. Please see the departmental website for more information.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3760 Organic Chemistry III Winter Only (LEC: 3, LAB: 3) [0.50]

This course provides an in-depth treatment of various aspects of organic chemistry. This will include such topics as the chemistry of heterocycles, polar rearrangements, organic photochemistry, synthetic planning and a detailed discussion of organic spectroscopy.

Prerequisite(s): CHEM*3750

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3860 Quantum Chemistry Fall Only (LEC: 3, LAB: 1) [0.50]

This course provides an introduction to quantum chemistry and how it applies to the understanding of the electronic structure of atoms and molecules, as well as the geometric structure of molecules. The theoretical background needed to understand molecular spectroscopy is also provided. An integral part of this course is the use of commercial software for the computation of molecular properties.

Prerequisite(s): CHEM*2070, (MATH*2170 or MATH*2270)

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*3870 Molecular Spectroscopy Winter Only (LEC: 3, LAB: 3) [0.50]

This course covers elementary group theory with applications to molecular spectroscopy and provides a continuation of the topics of rotational, vibrational and electronic spectroscopy and their applications in chemistry from CHEM*2070.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): CHEM*3860, (MATH*2150 or MATH*2160)

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4010 Chemistry and Industry Winter Only (LEC: 3) [0.50]

This course examines industrial processes for the production of organic and inorganic chemicals. The environmental impact and the challenges of a large-scale operation will be considered alongside the actual chemical processes involved.

Prerequisite(s): CHEM*2700, (CHEM*3430 or TOX*3300), (1 of IPS*1510, MATH*1210, MATH*2080)

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4400 Advanced Topics in Analytical Chemistry Winter Only (LEC: 3) [0.50]

Recent developments in instrumental methods of chemical analysis. A typical selection will include topics from the areas of surface analysis and the applications of lasers in chemical analysis.

Prerequisite(s): CHEM*3430

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4620 Advanced Topics in Inorganic Chemistry Fall Only (LEC: 3) [0.50]

This course provides a contemporary treatment of subjects of current interest in modern inorganic chemistry. Possible topics include solid state chemistry, main group chemistry and organometallic chemistry.

Prerequisite(s): CHEM*3650

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4630 Bioinorganic Chemistry Winter Only (LEC: 3) [0.50]

This course covers the role and importance of transition metal systems in biological processes.

Offering(s): Offered in odd-numbered years.

Prerequisite(s): BIOC*2580, CHEM*3650

Co-requisite(s): CHEM*3650

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4720 Organic Reactivity Winter Only (LEC: 3) [0.50]

This course is an introduction to physical organic chemistry, including discussion of reactive intermediates, substituent effects, medium effects, the mechanisms of organic reactions and the theoretical description of the bonding in organic molecules.

Offering(s): Offered in even-numbered years.

Co-requisite(s): CHEM*3760

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4730 Synthetic Organic Chemistry Fall Only (LEC: 3) [0.50]

This course provides an introduction to synthetic organic chemistry, including discussion of retrosynthetic analysis, modern synthetic methods, organic reaction, and syntheses of natural products. The integration of these topics for the rational design of synthetic schemes will also be discussed.

Prerequisite(s): CHEM*3750

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4740 Topics in Bio-Organic Chemistry Fall Only (LEC: 3) [0.50]

This course covers the principles, methods and techniques of current bio-organic chemistry with emphasis on modern synthetic and analysis methods applied to biological molecules, a molecular based approach to structure recognition, and an introduction to molecular modeling and drug design.

Prerequisite(s): BIOC*2580, CHEM*3750

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4880 Topics in Advanced Physical Chemistry Winter Only (LEC: 3) [0.50]

This course will cover selected topics in advanced physical chemistry. Possible topics include statistical thermodynamics, advanced quantum chemistry, spectroscopy, and magnetic resonance.

Offering(s): Offered in even-numbered years.

Prerequisite(s): (CHEM*2820 or PHYS*3240), CHEM*3860

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4900 Chemistry Research Project I Summer, Fall, and Winter (LAB: 12) [1.00]

This research project and seminar in chemistry is designed to provide senior undergraduates with an opportunity to conduct research in an area of chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration. Students cannot choose a supervisor with whom they already have research experience in another capacity (e.g. a summer research position). The project supervisor must be a faculty member of the Chemistry Department. Students should note that most projects are of two semesters' duration, and should plan their studies on the expectation that they will also register in CHEM*4910 in a subsequent semester.

Prerequisite(s): 5.00 credits in chemistry including (1.50 credits from CHEM*3430, CHEM*3640, CHEM*3650, CHEM*3750, CHEM*3760, CHEM*3870)

Restriction(s): Instructor consent required.

Department(s): Department of Chemistry

Location(s): Guelph

CHEM*4910 Chemistry Research Project II Summer, Fall, and Winter (LAB: 12) [1.00]

This is a research project and seminar in chemistry. Students must make arrangements with both a faculty supervisor and the course coordinator prior to registration.

Prerequisite(s): CHEM*4900

Restriction(s): Instructor consent required.

Department(s): Department of Chemistry

Location(s): Guelph
