

BIOLOGICAL ENGINEERING (BIOE)

School of Engineering, College of Engineering and Physical Sciences

Biological engineering integrates a strong engineering and technology foundation with biological, chemical, pharmaceutical, and environmental principles. Our interdisciplinary curriculum prepares engineers with specialized expertise to design and analyze new and sustainable ways to produce safe and abundant food, develop innovative environmental solutions for agricultural and urban waste management, and life-enhancing and life-saving products. Sample Careers: process and product engineer, research and development specialist, engineering consultant.

Major Requirements (Honours)

This is a major within the degree: Bachelor of Engineering (calendar.uoguelph.ca/undergraduate-calendar/degree-programs/bachelor-engineering-beng/).

This major also requires the completion of an area of emphasis as listed. Students are encouraged to speak with a Program Counsellor when choosing an area of emphasis. An area of emphasis must be declared prior to the commencement of Semester 5.

Note: A major in Biological Engineering with a Food Engineering Area of Emphasis cannot be combined with a minor in Food Engineering.

Note: A major in Biological Engineering with an Environmental Engineering Area of Emphasis cannot be combined with a minor in Environmental Engineering.
