The major in Equine Management focuses on the development of leaders with a genuine regard for all horses and their well-being, a conscious concern for the environment, and a passionate interest in all aspects of the horse industry. The program combines a solid background in business, biological sciences and equine management through practical and theoretical experience. It provides in-depth understanding of the economic, environmental and social dimensions of all equine disciplines with a broad and current knowledge of horse industry issues and develops the skills to gather, access, interpret and apply industry data. In consultation with the faculty advisor, students can participate in international exchange. Students can also incorporate a variety of field trips, experiential learning in the workplace and independent research projects into their program.

This program is designed to partially meet the current requirements for entry into the DVM program of the Ontario Veterinary College. Students who are considering this option should contact their program counselor early in their studies. Prospective candidates for the DVM program should consult the admission requirements for the program.

Students taking the degree may also take a minor in another subject area. A maximum of 2.50 credits required for the BBRM.EQM program may be applied to meet the requirements of a minor. Students should note that completion of a minor may require additional credits beyond the 20.00 required for the program. Students intending to acquire a minor should consult with their Program Counsellor.

This major will require the completion of 20.00 credits: 13.50 from required courses, 5.00 from restricted electives and 1.50 electives. Of these credits, a minimum of 6.00 credits are required at the 3000-level or higher, of which at least 2.00 credits must be at the 4000-level.
