

INTERNATIONAL DEVELOPMENT STUDIES (IDS)

Interdisciplinary Program

International Development Studies, College of Social and Applied Human Sciences

The program in International Development Studies (IDS) explores the causes, consequences and solutions to social, political and economic inequalities, in Canada and across the globe, from an interdisciplinary perspective. It equips students with the analytical and practical skills needed to tackle complex global problems and promote social justice in a wide variety of careers across the private and public sectors, and to bring about inclusive and impactful change in the world.

The IDS program features a number of experiential learning opportunities including co-op, field schools and capstone courses. International Development Studies students are encouraged to study additional languages, and to participate in relevant learning experiences beyond the IDS program, including studying abroad, and internships, work or volunteering in Canada and internationally.

In their second year, IDS students choose an interdisciplinary area of emphasis that enables them to explore an issue of particular interest to them.

The five areas of emphasis are:

1. Agriculture and Food Security (p. 1)
2. Inequalities and Social Justice in the Canadian Context (p. 2)
3. Politics and Conflict in Development (p. 2)
4. Environment and Sustainable Development (p. 2)
5. Gender and Inclusive Development (p. 3)

Students with a minimum cumulative average of 80% in courses that constitute the IDS major may complete a thesis (IDEV*4100 Thesis in International Development Studies I and IDEV*4150 Thesis in International Development Studies II) under the supervision of an ID-affiliated faculty member.

Major Requirements (Honours)

This is a major within the degree: Bachelor of Arts.

A minimum of 10.00 credits is required, including:

- 7.50 core course requirements
- 2.50 credits in one of five areas of emphasis

Environment and Sustainable Development

This area of emphasis focuses on the relations between environmental change and natural resources and sustainability. It explores the ways in which the environment and natural resources impact development, and the development challenges posed by environmental change and natural resource use locally and globally. Topics might include urbanization, consumerism, environmental governance, natural disasters, water, land use and climate change. Particular focus is put on approaches to development that are sustainable and address challenges associated with global climate and environmental change. This area of emphasis aims to empower students to bring about positive change that promotes inclusive and sustainable development locally and globally.

Gender and Inclusive Development

This area of emphasis focuses on the need for development to be viewed through the lens of inclusivity, most notably with respect to gender.

It explores the ways in which development often acts to exclude or negatively impact women and other marginalized groups, and the need for development policies and programs to be designed and implemented in a manner that promotes inclusivity with respect to gender. The notion of gender-inclusive development is examined through the perspective of intersectionality. Whilst particular attention is given to gender, there is also examination of sexuality, race, indigeneity and other dimensions of marginalization.
