

# MANAGEMENT (MGMT)

## Department of Management, Gordon S. Lang School of Business and Economics

The major in Management provides a balanced foundation of management knowledge and strategic leadership skills that will enable graduates to one day work as professional managers and organizational leaders. The major focuses on broad, transferrable competencies within the academic discipline of management (i.e., planning and goal setting, strategy development and execution, managerial decision making, designing organizational structure, managing change and innovation, motivating individuals and teams, managerial communication, negotiation and conflict management), while simultaneously providing the flexibility to explore a wide range of courses in other business disciplines. This major is well suited to students with a strong interest in the core skills of management who wish to develop a broad understanding and expertise in business management.

Courses extend beyond the traditional lecture based format to include community based group projects, guest lecturers, in-class simulations and case-based learning to help link academic expertise and theory with industry practice. Experiential learning is an integral part of the major, and occurs through the integration of industry examples in the classroom, and a required management capstone course that takes a consulting perspective to address real-world and simulated organizational challenges.

Graduates of the Management major will leave the University of Guelph equipped with a range of knowledge and skills which prepare them to meet management needs of the future in such roles as management consultant, business analyst, talent management specialist or as future general managers.

A principal aim of the Co-op program in Management is to facilitate the transition of students from academic studies to a professional career by enhancing the integration of theory and practice.

## Learning Outcomes

By the end of the Bachelor of Commerce program, graduates will be able to:

- Demonstrate the ability to think critically by identifying, evaluating and integrating relevant information from a variety of sources to solve complex business problems
- Demonstrate an ability to work effectively in teams, through the application of appropriate knowledge and skills such as responsible decision-making and personal accountability
- Identify and professionally respond to team issues and develop a new approach to enhance team performance
- Discuss and apply principles of corporate social responsibility to business issues and operations.
- Communicate effectively in a business context through written documents to a variety of audiences
- Communicate effectively in a business context through oral communication to a variety of audiences
- Demonstrate competency and understanding of core business knowledge and concepts.
- Demonstrate proficiency in the ability to integrate knowledge and understanding within specific majors through analysis and

recommendation of solutions to 'major specific' business problems and business decision-making.

Management major graduates will also be able to:

- Demonstrate proficiency in the identification, analysis and application of evidence-based management techniques and decision-making to solve management problems.
