

# PROJECT MANAGEMENT (PM)

## Department of Management, Gordon S. Lang School of Business and Economics

The Minor in Project Management focuses on developing the broad set of knowledge and competencies expected of project management professionals. The courses are unique, varied and relevant to student who are interested in pursuing careers in business, engineering, computer science, bio-resource management, environmental design and rural development or other related fields.

By taking this minor, students will advance competencies in the following areas:

- Project Management
- Organizational Behaviour
- Leadership
- Communication

## Learning Outcomes

After completing a Minor in Project Management, the student will be able to:

- Describe the fundamentals of project management, full project life cycle and various project management processes.
- Define stakeholder expectations and initiate a project successfully.
- Create a comprehensive project plan.
- Work effectively in teams and interact with stakeholders.
- Plan and monitor project budgets and schedules.
- Demonstrate the basic tools and techniques of managing project quality and risk.
- Accurately identify, develop and manage required resources.
- Navigate a project experiencing scope, resource, and scheduling constraints through effective communication.
- Describe the technical and human aspects of project control, especially change control.
- Describe the contextual relationship between the project and the organization that hosts the project.
